*Goodness
in Every Drop.*

Manuka Honey

Manuka honey is a premium, monofloral honey produced primarily from the nectar of the Manuka plant (*Leptospermum scoparium*). It is especially valued for its distinctive flavor and naturally occurring compounds such as methylglyoxal (MGO).

Origin: New Zealand

Floral Source: Manuka

(*Leptospermum scoparium*)

Color: Golden Amber to Dark Amber

Profile: Rich, earthy & slightly caramel-like

Key Benefits

- Antibacterial Properties
- Antioxidant Support
- Soothing Effect
- Natural Energy
- Immune Support

Wildflower Honey

Wildflower honey is a natural honey made by bees collecting nectar from a variety of wildflowers and flowering plants, rather than from one specific floral source. Its flavor, aroma, color, and composition can vary depending on the flowers and region.

Origin: Worldwide

Floral Source: Mixed Wildflowers

Color: Light Golden to Dark Amber

Profile: Floral, rich & naturally sweet

Key Benefits

- Natural Energy
- Antioxidant Support
- Naturally Sweet
- Everyday Wellness
- Rich in Floral Compounds

Acacia Honey

Acacia honey is a premium, delicate honey known for its very light color, mild floral flavor, and naturally slow crystallization. In the honey trade, "acacia honey" commonly refers to honey sourced mainly from the blossoms of black locust (*Robinia pseudoacacia*), particularly in Europe.

Origin: Europe

Floral Source: Black Locust
(*Robinia pseudoacacia*)

Color: Very Pale Yellow to Light Golden

Profile: Mild, delicate & floral

Key Benefits

- Natural Energy
- Antioxidant Support
- Naturally Soothing
- Mild & Delicate
- Slow to Crystallize

Clover Honey

Clover honey is a popular honey variety produced mainly from the nectar of clover flowers. It is known for its mild, sweet flavor and pleasant floral aroma, making it suitable for everyday use.

Origin: USA, Canada & Europe

Floral Source: Clover (*Trifolium* spp.)

Color: Light Golden to Amber

Profile: Mild, sweet & pleasantly floral

Key Benefits

- Everyday Wellness
- Naturally Soothing
- Natural Sweetener
- Natural Energy
- Antioxidant Support

Organic Multi-Floral Honey

Organic Multifloral Honey is natural honey produced by bees collecting nectar from multiple organically managed flowering plants. Because it comes from several floral sources, its taste, aroma, and color can vary naturally from one harvest to another.

Origin: Worldwide
Floral Source: Multiple Organic Flowers
Color: Light Golden to Dark Amber
Profile: Naturally rich, floral & aromatic

Key Benefits

- Diverse Floral Compounds
- Antioxidant Support
- Natural Energy
- Naturally Sweet
- Everyday Wellness

Raw & Unfiltered Honey

Raw & Unfiltered Honey is honey that undergoes minimal processing and filtration, helping retain naturally occurring pollen, enzymes, and fine particles from the hive. It may have a naturally rich aroma, texture, and flavor.

Origin: Worldwide
Floral Source: Various Flowers
Color: Golden to Dark Amber
Profile: Rich, natural & full-bodied

Key Benefits

- Minimally Processed
- Antioxidant Support
- Naturally Rich in Pollen
- Natural Energy
- Full-Bodied Flavor

Discover Our Signature Honey Flavors

Lavender Honey

Lavender Honey is a delicate floral honey produced from lavender blossoms, offering a naturally sweet taste with a subtle aromatic and herbal character.

Base: Natural Honey + Lavender Nectar
Taste: Sweet, floral, aromatic & subtly herbal
Color: Light Golden to Golden Amber
Usage: Tea, Toast, Yogurt, Desserts & Baking

Hot Chilli Honey

Hot Chilli Honey is a sweet-and-spicy honey blend infused with chilli, combining natural honey sweetness with a bold, warming kick.

Base: Natural Honey + Chilli
Taste: Sweet, spicy, warm & slightly tangy
Color: Golden Amber to Reddish Amber
Usage: Pizza, Fried Chicken, Cheese, Grilled Foods & Desserts

Mixed Berry Honey

Mixed Berry Honey is a fruity honey blend infused with a vibrant mix of berries, combining natural honey sweetness with a rich, juicy and mildly tangy berry flavor.

Base: Natural Honey + Mixed Berries
Taste: Sweet, fruity, juicy & mildly tangy
Color: Golden Red to Deep Ruby Red
Usage: Toast, Yogurt, Smoothies, Desserts & Pancakes

Vanilla Honey

Vanilla Honey is a smooth, aromatic honey blend infused with natural vanilla, combining the sweetness of honey with a rich, creamy and warm vanilla flavor.

Base: Natural Honey + Vanilla
Taste: Sweet, creamy, rich & aromatic
Color: Light Golden to Golden Amber
Usage: Coffee, Tea, Toast, Yogurt,
Desserts & Baking

Ginger Honey

Ginger Honey is a warming honey blend infused with ginger, combining natural honey sweetness with ginger's distinctive spicy, zesty and aromatic character.

Base: Natural Honey + Ginger
Taste: Sweet, warm, spicy & zesty
Color: Golden Amber to Deep Amber
Usage: Tea, Warm Beverages, Toast,
Marinades & Desserts

Cinnamon Honey

Cinnamon Honey is a warm and aromatic honey blend infused with cinnamon, combining natural honey sweetness with cinnamon's distinctive spicy, woody and comforting flavor.

Base: Natural Honey + Cinnamon
Taste: Sweet, warm, spicy & woody
Color: Golden Amber to Deep Amber
Usage: Tea, Coffee, Toast, Oatmeal,
Yogurt & Desserts

NATURE'S BEE TREASURES

PURE • NATURAL • NUTRITIOUS

*More
Than Honey,
A Healthier
Tomorrow*

Bee Pollen

Bee pollen is a natural bee-collected product made from pollen gathered from flowering plants. It is rich in proteins, amino acids, vitamins, minerals and other plant-derived nutrients.

Source: Flower pollen collected by honey bees
Taste: Floral, earthy, slightly sweet & nutty
Color: Yellow, golden, orange to brown
Usage: Smoothies, yogurt, oatmeal, breakfast bowls & sprinkled over foods

Bee Bread

Bee bread is fermented pollen, naturally processed by bees in the hive. It is created when bee pollen is mixed with honey/nectar and bee enzymes, then fermented and stored in honeycomb cells.

Source: Fermented bee pollen
Taste: Tangy, earthy, slightly sour
Color: Dark yellow, orange to brown
Usage: As a functional food, dietary supplement or added to smoothies and breakfast foods

Royal Jelly

Royal jelly is a creamy, nutrient-rich substance produced by worker bees to nourish the queen bee. It is naturally rich in proteins, vitamins, minerals and unique bioactive compounds.

Source: Produced by worker bees
Taste: Slightly tangy, creamy & mildly acidic
Color: Pale yellow to off-white
Usage: Dietary supplement, skin care formulations & functional foods

Propolis

Propolis is a natural resinous substance collected by bees from tree buds and plant sources. Bees use it to protect and maintain their hive. It is known for its naturally occurring bioactive compounds.

Source: Plant resins collected by bees
Taste: Resinous, earthy, bitter
Color: Brown, dark brown to greenish brown
Usage: Dietary supplements, wellness products, throat care & natural formulations

Honey Comb

Honeycomb is the natural wax structure built by bees to store honey. It is a pure, minimally processed product, offering honey in its most natural form along with edible beeswax.

Source: Natural honey stored in wax comb
Taste: Naturally sweet & mildly waxy
Color: Golden yellow to amber
Usage: Direct consumption, cheese boards, desserts & gourmet foods

Honey Sticks

Honey sticks are single-serve, convenient packets filled with pure natural honey. They are easy to carry, mess-free and perfect for on-the-go use.

Source: Pure natural honey
Taste: Naturally sweet
Color: Golden amber
Usage: On-the-go energy, travel, school, office, beverages & direct consumption

Honey Powder

Honey powder is natural honey that has been gently dehydrated into a fine powder, retaining its natural sweetness and functional properties. It is easy to use and ideal for various food and beverage applications.

Source: Dehydrated natural honey
Taste: Sweet, mild & smooth
Color: Light cream to pale yellow
Usage: Baking, beverages, confectionery, dairy products & food formulations
